MINI KVM EXTENDER

CONTROL YOUR COMPUTER OR KVM SWITCH UP TO 70M/230FT AWAY

The Mini KVM Extender is an affordable solution for extending your KVM console from your computer or KVM switch to remotely control and run applications at a distance of up to 70m/230ft away over clutter free CAT5/6/7 cable.

Tailored for every need

If you're working from a small home office (SOHO), the Mini KVM Extender is the preferred extended control solution - just place the KVM console where you want and the computer where you need and you're all set to go!

For industrial applications such as manufacturing lines or clean rooms, the Mini KVM Extender provides maximum safety and security allowing you to place computers and servers in a single centralized location, away from any production hazards.

Secure, Flexible, Affordable

IT managers seeking extended access to server rooms in a tightly secured environment will find the Mini KVM Extender particularly efficient and easy to use. Ideal also for presentation and training applications, the Mini KVM Extender provides flexibility and security coupled with highly attractive pricing.

Compact Solution

The Mini KVM Extender is made up of 2 micro sized, compact units: the Transmitter unit that connects to the computer and the Receiver unit that connects to the KVM hardware. The Mini KVM Extender is a pure hardware solution making it both software and network independent. The Mini KVM Extender connects a PS/2 console to any platform - PS/2, USB and SUN.
