- Output: DC 12V - 24V (max)
- USB Port: 5V 2A
- Cable length: ~ 1.10m
- Size: 15,7x6.4x1.7cm
- Charger weight: 260g
- Power cable: IEC 320 C8

Lost the power supply of your notebook, or want an extra adapter? This slim universal notebook adapter replaces the power supply that came with your notebook. The EM3969 Universal Slimline Charger is only 2/3 inch thick. The charger works with notebooks and other devices up to 90 watts. Choose the power plug that fits your notebook, and the EM3969 will automatically change its output voltage. Besides the excellent notebook charging capabilities, this EM3969 has also a built-in USB charging port. The USB charging port can supply up to 10W. This makes it suitable for all common USB accessories including the latest generation of tablet computers. Charge your tablet computer for mobile phone.

You can charge most common USB devices by the high power 10W USB charging port.

As the EM3969 has a high power charging port of 10W (5Volt, 2Ampère), it will fully charge your tablet computer.

Also other USB devices as mobile phones and MP3 players can be charged.

The USB charging port is very easy to access.

Solid quality plugs

Tired of those universal adapters with power plugs that break easily, and do not fit your notebook as well as promised? The EM3969 has solid high quality tips. They fit firmly into power socket of your notebook. The adapter is shipped with tips for several brands, including Asus, Samsung, Sony, HP, Lenovo, Delta, IBM, LG, MSI, LS, Compaq, NEC, Panasonic, Fujitsu, Sony, BenQ and Acer. This universal power supply adjusts its output voltage using an intelligent technique that detects which power plug is connected. To find the plug that fits your notebook, do not only check if the plug physically fits the power socket of your device, but also check if the voltage that is indicated on the tip of the adapter is correct for your notebook. The product box gives an overview of the voltage of each power plug.

Optimal Safety

No concessions were made to safety. The adapter has a fourfold intelligent protection system, that protects against overheating, over voltage, over current and short circuits. Also, the adapter stops charging when it notices that your battery is full.

Free tip service

To support most common notebooks, 11 tips are provided with the notebook charger by default. We have also a free tip service to support more notebooks. Check the complete list of tips on the support page of your product and the manual to request it at our support desk. When available, the requested tip will be sent to you for free.

How to calculate the wattage of your notebook

To see if the universal charger is suitable for your netbook or notebook, you can calculate the wattage of your laptop. First, check your current charger or check the properties of your notebook. Then multiply the volts by the amperage to calculate the total watts needed. For example, if your current charger has an output of 15V 3A, you need an adapter with 45 watts (15V x 3A) at minimum
