

KEYB-V100

NEWSTAR KEYBOARD/MOUSE SUPPORT

The KEYB-V100 is a keyboard and mouse support (75x23 cm). In combination with the connection plate KEYB-V100RACK you can combine this support with a desk-, ceiling or wall mount.

The KEYB-V100 offers a keyboard and mouse to be mounted everywhere. It can be mounted to the wall, ceiling or on a desk by using the connection plate KEYB-V100RACK. Any mount with VESA100 can be used.

This bracket uses the VESA hole pattern allowing this holder to use with every NewStar LCD mount. Because of this, you choose the solution which fits your situation. So you can choose for wall mount as for gas spring desk mounts. Combinations of keyboards, mice and LCD screens is simply possible.

Our example shows a LCD desk mount model FPMA-D940HC combined with KEYB-V100 (75x23 cm) and KEYB-V100RACK. The installation can be done in a snap!

The holder has been arranged both for left - and right-handed users. Every keyboard and mouse are appropriate on this holder.
