About This User's Manual

Kanvl

You are reading the *Kanvus KuPen Air* User's Manual. This Manual provides information regarding the components of the *Kanvus KuPen Air* and how to use them properly. The following are major sections of this User's Manual :

- Product Introduction
 Introduce the components of *Kanvus KuPen Air*.

 Getting Started
 A learning chapter guides you in getting started with the *Kanvus KuPen Air*.
- Using the Device
 Offers a brief instruction on using the Kanvus KuPen Air.
- 4. Using the Bundled SoftwareA walkthrough on using the utility of *Kanvus KuPen Air*.
- 5. Specification Summary Provides you specifications summary of *Kanvus KuPen Air*.
- 6. Troubleshooting

Trouble shooting and FAQ for *Kanvus KuPen Air*, where you can find the answers to most common problems.

Notes for This Manual

A few notes and manuals are used throughout this guide, allowing you to complete certain tasks safely and effectively.

1. MARNINGImportant Information that must be followed for safe operation.2. More than the followed to prevent damage to data, components, or persons.3. More than the followed to prevent damage to data, components, or persons.4. More than the followed to prevent damage to data, components, or persons.4. More than the followed to prevent damage to data, components, or persons.

Safety Information

kanvus

Adhering to the following safety information will prolong the life of the device.

- 1. DO NOT try to open the housing of the receiver unit and the digital pen. It will void your warranty.
- 2. DO NOT expose to or use near liquids, rain, or moisture.
- 3. DO NOT place or drop objects on top of the receiver unit. It might affect the receiver sensitivity.
- 4. DO NOT expose to strong magnetic or electrical fields.
- 5. DO NOT throw the receiver unit and digital pen in municipal waste. The product has been designed for proper reuse and recycling of parts. The symbol of the crossed-out wheeled bin indicates that the product should not be placed in municipal waste. Check your local regulations for disposal of electronic products.
- 6. Do not connect more than one set of this device at the same time. That may cause interference with each other.

Care and Cleaning

- 1. DO NOT expose to dirty or dusty environments to avoid wearing-down the surface of the receiver unit.
- 2. DO NOT use any kind of volatile liquid on the surface, as it will damage the plastic case.
- 3. Store your receiver unit and digital pen in a clean, dry place and avoid extreme temperatures.

Product Features

Thanks for purchasing Kanvus product! With this **Kanvus KuPen Air**, you can capture any handwritten notes or drawings on a plain piece of paper and store them in its internal flash memory. Captured notes can be uploaded to a computer via its USB interface. This is an ideal and convenient pen tool when you are away from computer while being in a need to capture any thought or important point.

Kanvus

- Capture handwritings and drawings and transfer them to a computer even when you are away from a computer.
- When you connect this product to a computer, it works not only as a PC compatible tablet to directly insert writings into Windows Vista and Office 2007 systems, but also with functions as a PC mouse.
- Save captured handwritten notes into built-in flash memory over 100 A4 pages.
- Upload captured handwritten notes to a computer via USB connection.
- No installation is required to activate the digital ink pen in Vista and Office 2007.
- Standard ink refill and batteries. No particular type of paper is required.
- Including Easy Note Taker application software that helps you save, edit, e-mail and organize your handwriting notes, drawings, sketches easily.
- Built-in rechargeable battery and LCD status indication on the receiver unit.
- Including a handwriting recognition software MyScrpt[®] Notes Lite that supports 22 languages so that you can transfer your writings into editing-enabled formats (DOC, TXT).

Package Contents

• Kanvus KuPen Air Receiver Unit

Quick Start Guide

Kanvus

USB Cable

Carry Case

Kanvus KuPen Air Installation CD

MyScript Notes Lite CD

Receiver Unit

Refer to the picture below.

kanvus

Descriptions

(1) - USB Port : Connects to a USB port on your computer via the USB cable provided in this

product package when you need to upload your writing to your computer.

(2) — LCD Screen : The LCD Display on the receive unit indicates the main status of operation.

Please refer to "LCD Indicator" section of chapter 3 for more details.

(3) — Front Panel Button : Press and hold it for about 5 seconds to turn on / off the Receiver Unit,

or press it gently to create a new saved page when you work away from a computer.

(4) — Reset Button : Reset the unit. To reset the unit, stab into the hole with a tip.

The Receiver Unit will power off automatically after 60 minutes of idle time when it is in standby.

Digital Pen

Refer to the pictures below.

kanvus

Descriptions

(1) — Pen Tip : Tapping the Pen Tip quickly acts as the Left-Click of the mouse, tapping it slightly

longer to function as the Right-Click of the mouse.

(2) — Button : Functions as the Left-Click of the mouse in mouse mode when it is linked to a

computer.

(3) — Pen Cap : Use the extractor at the front end of the cap to change the refill. Cover the pen tip

with the Pen Cap to protect the pen tip.

Changing the battery

- 1. Twist the battery lid and remove it.
- 2. Put in two SR41 batteries one at a time, with the positive poles facing up.
- 3. Cover the battery lid back by twisting it.

Replacing the refill

- 1. Pull off the cap of the digital pen.
- 2. Insert the ink refill in the middle of the extractor. Hold the pen

firmly, and apply some pressure against it. (You must hold the

pen tightly in order to do so.)

- 3. Pull the used refill out.
- Slide in the new refill via the tip of the pen.
- Gently push the new refill until it is fixed in place securely.

-Installation -Configuration

Installation

Windows

Installing the Driver Software on Windows

1. Once you insert the installation CD into your CD ROM drive, the main installation window will

kanvus

appear immediately.

If the main installation window does not appear automatically, please run the installation manually by clicking on [My Computer]
[CD/DVD ROM], then start the "Autorun" program.

2. Please select "Driver Setup" and a language to start the installation wizard.

Kanvus

4. You will see the information about the destination folder. Click "Next" to install to this folder, or dick Charles the default destination folder, or click
 "Change" to install it in a different folder.

5. Click "Install" to begin the installation.

6. When the installation is completed, click

"Finish" to exit the wizard.

Mac OS

Installing the Driver Software on Mac OS

 Please insert the installation CD into your CD ROM drive. The "Note Taker" main window will appear, and then click on "NoteTaker.pkg" to start the installation wizard.

kanvus

 When you see "Welcome to the Note Taker Installer" message window, click "Continue" to proceed with installation of "Note Taker Preferences".

Install NoteTaker

 Select the volume where you want to install the software, and then click "Continue".

Kanvus

- 4. Click "Install" to perform a standard installation of the software on the volume you selected. If you want to install in a different destination, please click on "Change Install Location" to go back to the previous step.
- 5. Remember that Mac computers require a set of username and password during installation or un-installation. Enter your password and click "OK" to begin the installation.
- When the message "Install Succeeded" is displayed, click "Close" to exit the wizard.

Connecting the Device

Installing the Device on computer

- After you have properly completed the driver and software installation, link the receiver unit to a computer via USB interface with the USB cable provided
- 2. Place your receiver unit on top of a paper, and the sensor coverage is about an area of an A4 size paper. Then you can start capturing handwritings and drawings to your computer. For more detail settings please refer to "Configuration" section.

kanvus

The driver must be installed before you connect the device.

Configuration

Windows

Once you installed "Easy Note Taker" and run the application program, you can see the following

kanvus

icon showing in the system tray.

Unit Not Detected. Device is not connected to computer.

Mouse Mode. It is the default setting when you have connected the device with computer.

Initial Settings

When you perform the application and plug in the device at the first time, you should be asked to

complete some initial settings.

1. Set Digital Note Mode

Select an operation mode to active in default when the device is plugged every time.

Set Digital Note Mode	Set Digital Note Mode	×
When I start the application, use the following mode: Note mode Mouse Mode OK Cancel	When I start the application, use the following O Note mode O Mouse Mode OK Cancel) mode:

(1) Note mode : Your writing on a paper will create a note page within the Note Taker application.

You will see your handwritings on the screen immediately.

(2) Mouse mode : The digital pen acts as a regular PC mouse with functions like moving the cursor,

left click and right click. Normally, you can activate and use ink related applications such as

Office 2007, Microsoft Journal, Windows Vista Ink applications in this mode.

Kanvus

2. Base Unit Orientation (Only supported in Windows XP)

Set and place your receiver unit orientation the same way as your actual writing habit.

The setting of your receiver unit orientation is the same no matter you work in Link Mode or Mobile Mode.

3. Using the Device

Kanvus

- -Usage Overview -Place the Receiver Unit
- -Coverage Area
- -Holding the Digital Pen
- -LCD Indicator

Usage Overview

The Kanvus KuPen Air enables you to work in two modes : Link Mode and Mobile Mode.

Link Mode

When you link the Kanvus KuPen Air to a computer, you are working on the operation mode which is referred as the Link Mode. This operation mode allows

kanvus

and view them on a screen. For further details, please refer to "Using the Bundled Software".

When you work in Link Mode, your writing or drawing on the paper will be instantly captured and displayed on the computer screen. You can do some further editing for the writing and drawing with the bundled software. The digital pen also acts as a mouse with features like Hovering, Left-Click,

Double-click, and Right-Click.

- You can move the mouse cursor with the digital pen by pressing the button on the pen or tap the pen tip on the paper once. Then, the pen can be used for hovering for about 60 seconds.
- To **Click** an object, point your mouse cursor on that object and tap the digital pen on the paper or press the button on your pen.
- To Double-Click an object, point your mouse cursor on that object and tap the digital pen twice on the paper or press the button on your pen twice.
- To **Right-Click** an object, point your mouse cursor on that object and press the tip of the digital

pen a bit longer on the paper. A special "Right-Click" cursor will appear. Lift the pen from the

paper, and the context menu (Right-Click menu) will appear.

Before you connect the device to a computer, make sure to install the Easy Note Taker application first.

Mobile Mode

When you are working with the Kanvus KuPen Air away

from a computer, it is called Mobile Mode. Under this

mode, you can capture and store your notes that were taken

1	Kanvus
KANV	u s
A splah	of live
t you for taking	g the time we as we had unveiled

kanvus

in a meeting, conferences or lectures while being away from a computer. Your notes / writings will

be stored in the internal memory of the receiver unit and you can upload them to a computer for

viewing, editing or email.

- Press and hold the front control button to power on the receiver unit.
- Place the receiver unit at the top center of a paper and make it firmly.
- Pick up the digital pen and start writing. The receiver unit will be started to capture your handwritings after you tipped the digital pen in the coverage on the paper.
- Once you have completed one page, shortly press the front control button to save current page

and start a new page. You can see the page number added by one on the unit screen.

When you are using *KuPen Air* to capture your handwriting in Mobile Mode, please always press the Front Panel Button after changing the page to ensure your writing will be on the new page while avoiding overlapping.

Place the Receiver Unit

The following images illustrate the ways you can place your receiver unit, according to the

kanvus

recommended positioning.

• Place your receiver unit at the top center of the paper for stronger sensor coverage.

Place your receiver unit at the top left corner of the paper for right handed users.

Place your receiver unit at the top right corner of the paper for left handed users.

When you intend to place the receiver unit at the top corner of the paper, please set the device orientation first according to your writing habits.

Coverage Area

Coverage area is the area that the receiver unit can sense the movement of the digital pen. The

Kanvus

sensor coverage is about an area of an A4 size paper and depends on the orientation you have

set.

The coverage area includes operation scope on the computer screen. The operation scope remains the same no matter the size and the resolution of different computer screens.

Holding the Digital Pen

Hold the digital pen as you would hold a pencil. When you are writing with the digital pen, make

sure its inclination to the paper surface is between 45° and 90°.

For better writing quality

Hold the pen firmly and write normally.

Do not block the receiver unit with your hand.

Do not place your hand between the pen and receiver.

kanvus

Do not hold the pen like a paintbrush.

Keep the buttons of the pen close to your index finger or thumb while the device is connected to a

computer, so that you can click the button easily.

7. Find Note

You can search notes through the database on two criteria.

(1) By description : Enter a keyword or keywords to search the note you want. It will match with all file names of notes (2) All notes created : Search notes by creation date parameters, you have to specify the date range.

included in database.

Look in <u>folder</u> :	My Notes	-
By <u>description</u>		
<u>S</u> earch for:	[
O All notes created:		
<u> B</u> etween	8/19/2009 👻 to	8/19/2009 👻
O During the last	1 days.	Find
🗇 During the last	1 months.	Canaal

8. Find Next

Skip from current note and find the next note which matches the search criteria.

Kanvus

9. Select All

Select all notes or folders in a specific folder.

View

1. Sort

(1) By Date : Sort your notes by created date.

(2) By Name : Sort your notes by file name.

2. Small Thumbnails

Display notes as small thumbnails in the Note Manager viewing pane.

3. Medium Thumbnails

Display notes as medium sized thumbnails in the Note Manager viewing pane.

4. Large Thumbnails

Display notes as large thumbnails in the Note Manager viewing pane.

You can change the thumbnail's size with the shortcut buttons in the toolbar directly.

kanvus

5. Zoom In

Enlarge the thumbnail view by 50%.

6. Zoom To Fit

Return the thumbnail view size to its original size.

7. Zoom Out

Shrink the thumbnail view by 50%.

The "Zoom" function is available only when viewing an individual note file. You can also use the shortcut buttons at the lower-left corner of the window to control it easily. $\bigcirc \Box \bigcirc$

1. Detect Hardware

Detect your device. You can also see if the device has been detected or not from the system tray

icon.

2. Set Device Clock

This operation will set your device clock to the Windows system time. It is in order to meet the

timing when you upload notes from the receiver unit.

The uploaded file is named in date and time by default.

3. Preferences...

- (1) General : Configure preferences for the general settings
 - (a) In the "Auto-Save note in" box, select the time interval (in minutes) after which the system automatically saves your note. This also activates an auto-recovery feature that recovers any unsaved information in case of system crash or power failure. The only input lost is changes made since

General 🥪 Mobile e	Printing	🖉 Pa	aper Holder	
Auto-Save note in Load when Window Save sticky notes of	vs starts.		minutes.	
	ок Г	Canc	el	Help

the last auto-save.

ß

You must tick the "Load when Windows starts." check box first to enable the Auto-Save function.

- (b) Tick the "Load when Windows starts" checkbox to automatically load the Easy Note Taker each time you turn on your computer.
- (c) Tick the "Save sticky notes on exit" checkbox to automatically save all the new sticky notes you created. The saved sticky notes will then instantly appear the next time you turn on your computer or restart the application.

(2) Mobile : You can set rule for the receiver

unit to upload new notes automatically or

not, when it is connected to a computer.

Kanvus

-Testing your device -FAQ -Service and Technical Support

-Driver Download

Testing your device

Please do the following tests first to identify your problem.

1. Check the device connection :

After you connect the device to your computer, the indicator of the receiver unit should be on

Kanvus

instantly. If it is not on, please follow these steps :

- (1) Make sure the USB cable is properly connected to a USB port on the computer.
- (2) Try connecting to another USB port.
- (3) If the device is connected to a USB Hub, please make sure the USB Hub is properly

connected to a USB port on the computer.

(4) Check if your USB controller is activated or not.

2. Diagnose the device :

If the digital pen or the receiver unit still does not work properly, please follow these steps to help diagnose the problem with the device.

- (1) Unplug the USB cable from computer.
- (2) Remove the driver program from the operating system.
- (3) Re-connect the device to a computer with USB connection.
 - (a) Check whether the indicator is on or not. If it is still off, that means there is an error with

your receiver unit.

(4) Download the latest version of the driver directly from our official website. You can also

This might be caused by an incompatibility issue.

(5) Install the latest version of the driver and restart your computer when the installation is completed

kanvus

- (6) After you restart the computer, run the application program and then connect the device.
 - (a) If you cannot launch the application program, it means the driver failed during start-up.

(b) Test your digital pen in the coverage area of receiver unit. If it can work as a mouse, it means the hardware is fine. If it does not work, try replacing the batteries for the digital pen.

(c) After changing the pen's batteries, if it is still not working, this means there is an error with the digital pen.

(b) If you are a Windows user, go to [My Computer] ► [Properties] ► [Hardware] ► [Device Manager], if there is an exclamation mark, it means the installed device driver is incompatible with the windows system. If you have this problem, please contact us immediately for help.

FAQ

Question : Why is there nothing on the LCD display when I power on the receiver unit ?

Answer : This means that the built-in battery power is too low. Please recharge the battery by connecting the device to a USB port of the computer directly, or use a USB charger to charge it.

kanvus

Question : Why doesn't the battery icon blink during charging ?

Answer : If you have already confirmed that battery power was not full yet, then it may mean that the USB port has a bad connection and the power supply is not stable.

- 1. Please refer to "LCD Indicator" section of chapter 3 for details regarding icons about status.
- 2. Re-plug the device again. If the problem remain, try changing to another USB port.
- 3. Replace the USB charger or USB cable with a new one.

Question : Why can't I see the pen stroke on the screen ?

Answer : Please check with the following steps.

- If the driver has not been installed, please run the Easy Note Taker application provided within the installation CD.
- Check the digital pen to see if it moves the cursor on the screen. If you have replaced a refill before, please also check the refill that you changed is in the same standard as the original standard.
- 3. Make sure the distance between the digital pen and receiver unit is within an area of A4 paper.
- 4. If the problem still remains, there might be some problems with the connection. Please try to

Question : Why is the pen stroke unreadable or discontinued during writing ?

Answer : Please refer to the following steps.

1. Try to write with more pressure on your pen. Or refer to "Holding the Digital Pen" section of chapter 3 for instruction on correct ways to hold the pen.

kanvus

- 2. Make sure the writing surface is smooth and flat.
- 3. Remove the barriers between the digital pen and the receiver unit to avoid signal block.
- 4. The battery power of the digital pen is too low, please replace the battery.

Question : How can I get the updated software ?

Answer : You can download the new driver from our website.

- 1. Uninstall your old driver.
- Download the latest version of the driver in the download section and save it onto your hard drive.
- 3. Unzip the file in a folder and save in your hard drive.
- 4. Double-click the Setup.exe in the folder where you unzipped the file to complete the installation.

Service and Technical Support

If your device does not work properly, please check the Troubleshooting procedure and FAQ first.

You can go to our web site to download the latest driver/software and check the updated FAQ. If

your problem still remains unsolved, please contact our service and technical support staff.

Declarations and Safety Statements

FCC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

Kanvus

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, according to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

You can determine whether the equipment is causing interference by disconnecting it from your computer. If the interference stops, it was probably caused by the equipment.

If the equipment does cause interference to radio or television, you may be able to correct the interference by using one or more of the following measures :

- 1 Rotate the television or radio antenna until the interference stops.
- 2 Move the equipment farther away form the television or radio.
- 3 Plug the equipment and computer into an outlet that is on a different circuit form the television or radio.

If necessary, consult with your dealer or an experienced radio/television technician for help.

CE

The **Kanvus** products have been tested and found to comply with the following harmonized European Norms :

- 1 EN55024 (electromagnetic immunity)
- 2 EN55022 (electromagnetic emissions)

Ordering Components and Accessories

To purchase parts and accessories, please contact your local dealer or distributor.
