SMART CAT5 SWITCH

COST-EFFECTIVE KVM SWITCH FOR FLEXIBLE SERVER CONTROL!

SMART CAT5 SWITCH

The line of 8 port and 16 port single user Smart CAT5 KVM Switches is Minicom's next-generation line of powerful, compact, cutting-edge, cost-effective rackmountable KVM switches. The sleek, 1U sized Smart CAT5 line features CAT5 cable to eliminate cable clutter, and powerful on-screen display control and management. The Smart CAT5 Switches support 8 or 16 computers, letting you control and operate all your servers with just one keyboard, monitor and mouse!

Rack mounting kit included with all models.

Better Server Management

Offering a choice of management control, the Smart CAT5 Switch gives you KVM control via On Screen Display, serial or push button controls.

Innovative RIC Cables

Buy platform-specific Minicom RIC (Remote Interface Connection) cables to support SUN, USB and PS/2, as and when you need them.

Multi-Layer Security

The Smart Switch features multiple user profile password protection.

SMART 16 IP

Sleek 16 Port KVM Switch with IP Access!

The 16 port, multi-platform, single user SMART 16 KVM switch also comes with an IP option. This gives convenient local and remote IP access and management of up to 16 servers at a time; hundreds when cascaded. It features power management functionality with remote hard reset and power off capability. The SMART 16 IP provides analog access for multiple servers at the rack, and digital access over LAN, WAN or Internet. Sleek, 1U sized SMART 16 IP features CAT5 cable to minimize cable clutter and powerful On Screen Display control. The SMART 16 IP is ideal for complex server and rack environments with network infrastructure in which remote access is required.
