DESCRIPTION

Do you want to connect your desktop computer or notebook to a wireless home network, company network or your friends' network? Use the EM4530 AC1200 Dual Band Wireless USB Adapter. Copying large files and video streaming is an easy job thanks to the high speed of 1200Mbps (300+900Mbps). The dual 4dBi antennas ensure optimal performance.

Dual Band technology
The EM4530 is a Dual Band Wireless USB Adapter. You can use the 2.4GHz or 5GHz frequency. The 2.4GHz frequency is besides wireless routers also used by many devices like microwave ovens, wireless phones and baby monitors. This band is crowded and endures many interferences. By using the 5GHz band you will have a cleaner frequency with less interferences.

Get the maximum throughput
Thanks to the Dual Band technology, speed up to 1200Mbps (300+900Mbps) and an optimal antenna placement, the best WiFi throughput is ensured. For maximum performance, we recommend an Eminent Gigabit AC Dual Band Router for you home network.
