Story

The AC7800 HDMI extender kit allows you to play an HDMI signal up to 50 meters with a maximum resolution of (3D) 1080p @ 60Hz. The Extender kit contains a transmitter and a receiver to connect with HDMI cables to a source device and a TV/monitor. Use one single CAT6 UTP cable up to 50 meters to connect the transmitter with the receiver.

---->

<----

Display your files up to 50 meters from a source device

Too much distance between your TV and media player or Blu-ray player? Choose the AC7800 Extender to play your movies remotely. The AC7800 is also a perfect solution for displaying a company presentation on a TV in the reception or cafeteria area of your office. The AC7800 plays everything without compromising video quality over a distance up to 50 meters.

Connecting your devices

Connect the transmitter with an HDMI High Speed cable to your HDMI source and connect the receiver to the TV with an HDMI High Speed cable. The transmitter and receiver are connected with one single UTP cable up to 50 meters. Both the transmitter and the receiver come with an additional AC Adapter.
