MEDI CAPTURE

Medical Imaging Made Easy™

MediCap USB170

MediCap® USB170

The MediCap USB170 is the medical industry's easiest full-featured image recording solution. Your images are saved directly to a USB flash drive or optional hard drive — a much simpler method than trying to capture images with a DVD recorder.

Medical Image Recorder
The MediCap is even simpler than the pocket camera you use on vacation. It records high quality still images from your endoscope, arthroscope, surgical camera, ultrasound, etc.

Intuitive Use
It's so easy, no training is needed. Just plug it in and go. You'll be saving images within minutes of opening the box.

Medical Grade
With its steel case and fluid resistant front panel, the USB170 is built to withstand the rigors of the OR, and it's so compact it will fit on any cart.

Powerful Options
compatible – versatile – affordable

USB Hard Drive
Perfect for archiving thousands of images on a single device

USB Keyboard
Input patient data to organize your image library

Network Adapter
Turn your USB170 into a mapped drive on your network

Foot Pedal
Connect your USB170 to your scope's trigger or to a foot pedal

Also Available...

MediCap® USB200 & USB300
Need more than still image recording? Add video recording with the USB200 (standard definition) and the USB300 (high definition).
