

DisplayPort to 4-Port DVI Video Wall UPDVX4H

DisplayPort to 4-Port DVI Video Wall is the simple video wall solution without needing to purchase an entire system. It can adjust video for multiple video monitors (H and V Bezel) to compensate for the frames between the monitors. It has 4 selections monitor display options and you can stack up to 3 units allowing for total of 12 selections monitor display options. Video content can be clone or stretch across the screens. All this can be done with front panel display and push buttons, no programming necessary.

Horizontal / Vertical Bezel Adjustment

Eliminate the video discrepancy from image stretch across multiple screens due to the monitor's frame.

Flexible Multi-monitors Display

For individual unit – you can select from 4 monitors (vertical or horizontal) or 2 x 2 monitors (vertical or horizontal).

For 3 units – you can select from 2 x 6 (vertical or horizontal) or 3 x 4 (vertical or horizontal)

Features:

- DisplayPort input, output by DVI / HDMI
- Hardware bezel correction, support H and V Bezel for 2 x 2 / 1 x 4
- Expendview or Clone Mode with Multi-Box option
- Support extended display resolution up to 3840 x 2160
- OLED display and 3 push buttons for easy operation
- Video card independent, no extra software needed

Specifications

Model No.	UPDVX4H
Video Input Port	DisplayPort x 2
Video Output Port	DVI-D x 4
Front Panel Display	OLED
Power & Control	Mini USB Type B
Video Resolution	3840 x 2160 (Expended)
Dimension (L x W x H)	165 x 88 x 44mm
Weight	600g
Housing	Metal
Operating Temperature	0°C ~ 40°C
Storage Temperature	-20°C ~ 60°C
Operating Humidity	0 ~ 90% RH, non-condensing
Safety / Emission	FCC / CE
