Enjoy Internet Radio everywhere and stream music!

The Eminent EM3710 wRADIO is a full-featured stand-alone Internet Radio. You can enjoy listening to thousands of radio streams from all over the world! The Eminent EM3710 wRADIO can also stream music from your computer to your radio, and allows you to plug in any USB memory stick or USB harddrive and listen to the music you have put on it.

Thanks to its built-in wireless function, it can quickly connect to your existing (WEP/WPA/WPA2 encrypted) home network. The channel list is updated real-time from the internet (vTuner network). This ensures that your radio always has the most current list of radio stations for you to choose from. You can select over 3300 radio stations. Found a new station? Post it on the vTuner site for everyone to enjoy!

The Eminent EM3710 wRADIO is 100% UPnP compliant so you can connect to any media server, like TwonkyVision and Tversity. It works out-of-the box with the Eminent EM4070 Nas (which comes with free TwonkyMedia server), and many other popular UPnP servers like Tversity or Nero Mediahome. This means that you can listen to the music you have put on your pc or network via the Eminent EM3710 wRADIO. Connect it to you stereo, look for your favourite music, sit back and enjoy!

Configuration is also a breeze, thanks to the large backlit LCD display. Just power it on, select your wireless network, enter your key, and you're ready to go!The Eminent EM3710 wRADIO more than just an internet radio!
