Cable and DSL Router

Share your Internet connection quick and easy!

Are you looking for a way to share your cable or DSL Internet connection with other users in an easy way? Then the Eminent Broadband Router is exactly what you need! With this device you can use and share your Internet connection and files with multiple roommates or family members.

The thought out firewall offers you state of the art security. Enjoy full Internet freedom without having uninvited guests taking a peek in your private data. For the parents: parental control is present! This advanced function blocks access to websites containing explicit content. Next to that, the Broadband Router allows you to conveniently enjoy online games on your PS2 or the Xbox! Whatever you do online: the Eminent Broadband Route makes sure it happens safely. This device is suited for both the novice and advanced 'home networker'. Of course the broadband router seamlessly works with other Eminent home networking products.

The specially developed installation CD-rom with an easy to use installation wizard configures your modem for your provider. The perfect solution for your home network or office network! "

● Broadband router for sharing your Internet connection
● State of the art security via firewall and parental control
● Easy installation wizard
