The Eminent EM7080 hdMEDIA RT high definition media player plays all your movies on your Full HD television. This all-round media player turns your living room into a movie theatre. Watching your HD movies is fun and easy, because the hdMEDIA RT is a very user-friendly device. Invite your friends and enjoy all your movies in Full HD quality!

The most effective way to play your media
The EM7080 hdMEDIA RT is extremely easy to use. Just connect the HDMI cable to your TV or Digital Receiver, and enjoy the crystal clear picture. The hdMEDIA supports an optional internal hard drive (SATA) up to 1.5TB that you can easily connect to your pc to be filled with media. And if you need more storage, simply connect a USB stick or hard drive and display your media files on your television. The EM7080 hdMEDIA RT also supports a broad range of mass-storage devices like digital cameras, camcorders, and portable music players, allowing you to directly connect by USB and play back the media stored on them.

Powerful Realtek chipset supports almost all video codecs
Thanks to the next-generation RT1073 DD processor, the EM7080 hdMEDIA RT can decode a broad range of video files like WMV9, MKV, VC-1, AVCHD MPEG-4, H.264 & X.264. All in Full HD 1080P resolutions. Classic formats like DivX, XviD, MPEG-1 and MPEG-2 are also supported. The popular ISO file format for DVD-ROM has full menu, chapters and subtitle support. BD-ROM ISO files can be played back with chapters and PGS subtitle streams as well.

Plays music and photos at the same time
The hdMEDIA RT supports a broad range of audio files including MP3, OGG, and the popular lossless FLAC format. And it's capable of multitasking as well, allowing you to play your music collection while watching your photos in a slide show at the same time!

Copy your movies to the hdMEDIA RT
If you have a large library of files stored on your computer, you can simply connect the hdMEDIA RT to a USB 2.0 port and quickly fill an (optional) internal hard disk with files. And if a friend comes by with media you'd like to share, you can use the built-in file manager to quickly copy files between the hdMEDIA RT and the friend's USB disk.

Access your files stored on your network
The EM7080 hdMEDIA RT can play media directly from your LAN network. So if you have your media files stored on a computer, or NAS device, you will love the networking support that we have integrated into the EM7080 hdMEDIA RT. The internal 10/100 LAN port allows you to quickly connect your home network and play files directly from your PC or other devices. Featuring full UPnP, SAMBA and NFS support you will never have a dull moment in your home again.

DTS and Dolby for crystal clear sound
A true cinema experience in your home: The EM7080 hdMEDIA RT is equipped with an internal Dolby Digital (AC3) and DTS decoder. There is no need for any external digital receiver to decode the audio and we support full downmix of AC3 and DTS 5.1 tracks. Should you have media with DTS-HD tracks you can also use the HDMI 1.3 audio function and connect a suitable external digital receiver.
