Pc fitted with Ethernet adapter.

EAN CODE: 8716065003550

Your own home network over the existing power lines!

Isn't it great to have your own home network? An ideal situation, but it is often hard to realise. You have to drill holes, draw cabling in places you do not want to. Eminent offers a completely different approach: your own home network over the only existing network in your house. A network that has offered its services for many years now and probably has never let you down: the mains! This system is as easy as it seems! Connect your modem to the wall outlet by using an xLINE Homeplug adapter. Then you connect your computer to another wall outlet by using a second xLINE Homeplug adapter and presto: Internet! If you want to connect several computers it is nice to know that Eminent also offers an EM8012 xLINE extension kit. Read on, because the best is yet to come! The xLINE adapters can be combined with every wired or wireless network. With the Eminent xLINE Homeplug adapters you can position your wireless router wherever you have the best reach. Great if you like to use a wireless notebook! If you like to share your broadband Internet connection with several users at the same time, then you need to have a (wireless) router. Connect an xLINE to this router. Connect an xLINE to every pc that needs to be connected. You easily connect the xLINE to your pc's network adapter with the enclosed UTP cable. Could it be easier? The xLine can also be used with Apple Mac, Linux, Playstation, Xbox and any other device with a network port.

- Set of two Ethernet adapters for super-speed (85Mbps) Ethernet over existing power lines
- Internet in every room, simply through the wall outlet
- Stable connection, no hassle with wires
- Security through 56-Bit DES encryption
