

THINCLIENT-10

NEWSTAR THIN CLIENT MOUNT

The NewStar thin client mount, THINCLIENT-10, installs a thin client simply to a monitor arm.

The NewStar thin client mount, THINCLIENT-10, installs a thin client simply to a monitor arm. A thin client mount creates more space on the desk, because the thin client is mounted behind the monitor. This way you can protect the thin client from dust, dirt and theft. The workplace can also be cleaned.

With the thin client mount behind the screen installed, you can benefit the cable management of the monitor arm. This creates an efficient, safe and tidy workplace.

The mounts are simple to adjust in width and depth. The thin client fits easily into thin clients support. The specifications are listed the maximum and minimum width and depth of the support.
