

NSLC200

NEWSTAR NOTEBOOK COOLER

The NSLC200 is a universal notebook cooler that cools a notebook by 15 degrees.

Instructions

1. Unfold the foot pads (see Fig. 1) and supports (see Fig. 2), take out the USB cable.
2. Adjust the cooler to the proper width to fit the size of the notebook computer (see Fig. 3).
3. Position your notebook computer squarely on top of the cooler (see Fig. 4).
4. Connect the USB cable to your notebook computer (see Fig. 5).
5. Retract the USB cable (see Fig. 6), foot pads and supports after use.

The NewStar notebook cooler, model: NSLC200, is your reliable partner for your laptop. This ergonomic stand fits below your laptop and reduces, due to its design, wrist injuries. The stand is height adjustable offering you the best viewing angle up to 6 degrees. Take full advantage of your laptop!

This cooler offers you more benefits. Laptops get slower due to warmth. This ideal tool reduces your laptop heat with 15 degrees preventing degradation of laptop speed. The low noise cooling fan connects to your USB port using a minimum of energy.

This model, NSLC200, is your ideal tool for traveling. Compact, light and easy to carry.
