

- Control 8 or 16 servers from one keyboard/video/mouse console
- New ROC (RICC on Cable) technology
- Extend distance between computer and switch up to 30m/100ft
- Rack-mountable, sleek, 1U space saving design
- Multi-layer security protects your corporate data
- Better server management, choice of On Screen Display, serial port or push button control
- Multi-platform control USB, PS/2 & Sun servers from the same console
- 3 year warranty

# Save Space and Money

The Smart CAT5 Switch 108/116 is a single-user analog KVM switch giving you the ability to control multiple computers or servers from a single keyboard/video/mouse console. The rack mountable, 1U-sized switch features innovative ROC (RICC on cable) dongle technology that directly connects you to each server in the rack, eliminating cable clutter and the need for multiple consoles.

## From SOHO to Enterprise

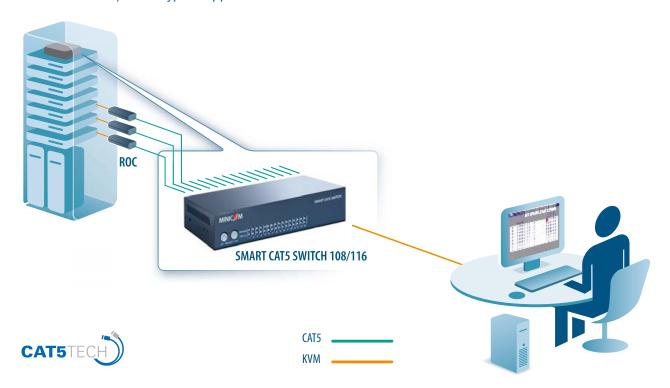

The Smart CAT5 Switch 108/116 is ideal for multiple server environments, from the small home office to the enterprise data center. Whatever the application, a company operating several servers can now connect them all to a single keyboard, video and mouse console, and operate them with 30m/100ft of range between the server and switch.

### Smart 116IP

The 16 port Smart CAT5 Switch 116 also comes in an IP version - the Smart 116IP, offering a single user the choice of analog or remote access via LAN, WAN or Internet.

# Smart CAT5 Switch 108/116 - Typical Application

# **Technical specifications**

Operating systems and Platforms	DOS, Windows, LINUX, UNIX, MAC and all other major operating systems		
Mouse	PS/2, Wheel mouse, Intellimouse, 5-button mouse		
Resolution	1600x1200@75Hz
