

AVT-6544 4x4 HDMI Matrix Switcher provides the capability to assign any of four HDMI inputs to any of the four HDMI outputs. The AVT-6544 senses when a valid HDMI connection has been made to either the input or output. All inputs and outputs are HDMI V1.3 compliant and the device can be controlled via an Infrared remote device or by use of dedicated front panel push buttons. V1.3 HDMI and HDCP compliant, the AVT-6544 provides a large variety of bit rates and signal format processing. In addition, DTS-HD Master Audio, Dolby True-HD and SACD Embedded Audio are fully supported. "Hot Plug" signal detection technology is integral to the unit. An ergonomically friendly design is implemented throughout and an AC power adapter is provided.

For more information on the HDMI standard, please visit [HDMI.org](http://HDMI.org)
