# Easy Pro View convert recordings to AVI

## 1.0 Introduction

This instruction will give instructions on how to convert recordings to AVI.

## 2.0 Why should I convert?

The Easy Pro View cameras will record the video streams in the file extension .CRF. The CRF file can only be played on a PC with the software “Easy Pro Play” or from the APP on your Smartphone/tablet. In some cases it is preferable to playback the file from another device. To do this you will need to convert the CRF file to AVI.

## 3.0 How can I convert one or more CRF files to AVI?

1. Download the “**Easy Pro View converter tool**” to your Windows PC.
2. Extract the file to the “Root” (C-drive) of your PC.
3. Copy the CRF files you wish to convert to the folder of the converter tool (C:\EasyProView\_convertToAvi\_v1.1.1)
4. Open the software “Convert to AVI.exe”
5. Click “**Run**”
6. Click the button “**Browse**” behind the field “Input”
7. Select the CRF file or files you wish to convert.
8. Click “**Open**”
9. Click the button “**Browse**” behind the field “Save in”
10. Select the folder you wish the converted recordings to be saved.
11. Click “**OK**”
12. Click “**Convert**” to start the conversion.
13. Please check in the lower left corner of the software and wait for the status to change to “done” to be sure the conversion is ready.
